PROFESSIONAL SUMMARY

Dedicated Java Full-Stack Developer with hands-on academic experience in designing and building scalable web applications. Proficient in Java, Spring Boot, and RESTful API development, with a strong foundation in MVC architecture, Spring Data JPA, and MySQL database management. Experienced in utilizing development tools such as Git, Maven, and Postman to streamline software workflows. Committed to writing clean, reusable, and efficient code. Seeking an entry-level developer position to contribute technical skills in software design, debugging, and application maintenance.

EDUCATION

Dr. D.Y. Patil Vidyapeeth

MCA | Dr. D.Y. Patil Vidyapeeth | 2025 - Present

Marwadi University

BCA | Marwadi University | 2022 - 2025 | GPA: 7.45

TECHNICAL SKILLS

Languages: Java (Core, OOP), Python, JavaScript (ES6+)

Backend: Spring Boot, Spring MVC, RESTful APIs, JDBC, MySQL, Spring Data JPA

Tools & Concepts: Git, Maven, Postman, MVC Architecture, Clean Code, SDLC

PROJECTS

Vertex Galaxy Bank (VGB) | Java Full-Stack Banking Application

- Developed a full-stack banking application using Java, Spring Boot, and MySQL to support core banking operations.
- Designed and integrated RESTful APIs to enable modular communication between frontend and backend services.
- Implemented multi-role access control, automated payment services, and transaction workflows using Spring MVC.
- Applied OOP principles and MVC architecture to ensure system scalability and code reusability.
- Utilized Git for version control and Postman for API testing to ensure reliable functionality.
- GitHub: [View Project](#)

Insurance Management System | Java Full-Stack Application

- Built a centralized application for managing insurance policies, customer data, and claims processing.
- Integrated Spring Data JPA with MySQL to optimize backend data persistence and reduce query complexity.
- Developed backend services following structured design patterns to maintain code cleanliness and maintainability.
- Performed API testing and troubleshooting using Postman to validate endpoint integrity and resolve technical defects.
