MY PROJECTS

Energy Consumption Estimator

HTML/CSS/JS | Python (Flask) | SQLite

- Developed a comprehensive web application allowing users to log 50+ household appliances to estimate monthly energy costs.
- Implemented detailed analytics to provide users with insights into consumption patterns.
- Designed a responsive UI using HTML/CSS and utilized MySQL for robust data persistence.

Courier Service System

HTML/CSS/JS | Python (Flask) | SQLite

- Built a logistics tracking and management system featuring a modern Glass morphism-inspired UI.
- Integrated an automated cost calculation engine based on parcel weight and distance.
- Managed data relationships and queries using SQLite for efficient backend operations.

Product Management System

HTML/CSS/JS | PHP | Apache MySQL | Bootstrap

- Created a streamlined inventory management system with full CRUD (Create, Read, Update, Delete) functionality.
- Optimized database schema to improve search performance and inventory tracking.
- Ensured a mobile - first user experience using the Bootstrap framework.
